

Product Overview

RediTALK-Flex

RediTALK-Flex is a radio dispatch console that provides full digital/analog functionality with two-channel operation and basic GPS location services. It supports VoIP connections to radio gateways, such as the Omnitronics IPR100, IPR110Plus, DRG100, and IPR400 devices, and other consoles. The RediTALK-Flex user interface (UI) can be used with a touchscreen display or a computer keyboard and mouse.
